PROFESSIONAL SUMMARY

Computer Science undergraduate in the final year of study with a strong interest in Artificial Intelligence, Machine Learning, and Data Science. Familiar with Python, SQL, and data analysis through academic coursework and personal projects. Developed a Smart Stock Management and Demand Forecasting System that applies machine learning techniques to predict sales and optimize inventory management. Strong written and verbal English communication skills, with the confidence to interact professionally with clients, colleagues, and international stakeholders. Passionate about learning emerging AI technologies, solving real-world problems, and building practical data-driven solutions.

EDUCATION

Bachelor of Science in Computer Science

2022 · Present (Expected 2026)

PMAS-Arid Agriculture University, Rawalpindi

TECHNICAL SKILLS

Programming Languages

Python, SQL, JavaScript, C++

ML & Data Science

Scikit-Learn, Data Preprocessing, Feature Engineering, Predictive Analytics, Model Evaluation

Libraries & Tools

Pandas, NumPy, Matplotlib, Jupyter Notebook

Web & Databases

Flask, HTML/CSS, JavaScript, SQLite

COMMUNICATION & SOFT SKILLS

English Communication

Strong written and verbal English; professional email and phone etiquette

Client Interaction

Clear, polite, and confident communication with clients and team members

Attention to Detail

Careful and accurate handling of data, records, and documentation

Time Management

Able to prioritize tasks and meet deadlines in fast-paced environments

Teamwork & Adaptability

Collaborative team player and a quick learner of new tools and processes

PROJECTS

Smart Stock Management & Demand Forecasting System FYP

Python | Flask | SQLite | Machine Learning | Scikit-Learn

- Developed a web-based inventory management and demand forecasting system.
- Implemented a HistGradient Boosting Regressor model trained on the Rossmann sales dataset, achieving ~73% R² score.
- Applied feature engineering techniques including lag features and rolling averages.
- Integrated inventory tracking, sales management, and forecasting capabilities using SQLite.
- Designed a responsive user interface using HTML, CSS, and JavaScript.

Movie Ticket Management System

SQL | Database Management

- Designed and implemented a relational database system for movie scheduling and ticket management.
- Created SQL queries for efficient data retrieval, manipulation, and reporting.
- Maintained data integrity through proper database design and normalization.

Computer Networking Simulation

Cisco Packet Tracer

- Designed and simulated a Local Area Network (LAN) connecting multiple systems.
- Configured IP addressing, subnetting, and routing.
- Performed network testing and troubleshooting to ensure reliable communication.

Relevant Coursework

- Database Management Systems
- Data Structures & Algorithms
- Computer Networks
- Information Security
- Software Engineering
- Artificial Intelligence

Focus Areas & Interests

- AI Engineering
- Machine Learning
- Data Analytics
- Predictive Modeling
